	<p>Bird Watching Program at various locations.</p>	<p>Bird Watching or Birding is a form of Wildlife Observation in which the observation of Avian species is a recreational activity or citizen science. It can be done with the naked eye. Through a visual enhancement device like binoculars and telescope. By listening bird sound, or by watching public webcams.</p> <p>Here we have chosen Two location for Birding i.e. Ambazari Biodiversity Park and Gorewada Biodiversity Park at different durations. Our First Birding session was held at Ambazari Biodiversity Park on 1st October 2023 .Twenty Two students were present for the program along with one Teacher faculty Dr. Avinash Ingole (Green Club Coordinator) and one Biology Expert Shri. Darshan Dudhane.</p> <p>Second session of Birding was held at Gorewada Biodiversity Park on 4th February 2024, here Eleven Students Participated with Two Teaching Staff Members of the college in association with Mr. Ajinkya Bhatkar(Wild life Warden and Senior Project Officer at WWF, India) and his Team</p> <p>Our Third Birding session was conducted again at Gorewada Biodiversity Park on 14th April 2024, in collaboration with SEAT (Save Environment And Tiger) Mr. Tejas Parshionikar and his team assisted us very well. There were Seven students and two teacher faculty was present for this event. Students were very interestingly locating the birds and spotting the bird species in and around .Moreover other people joined us when they saw us birding students having binoculars and camera so that they could click photos very easily. It was enriching and amazing experience watching birds and learning about them. We will look forward to more of these birding events. All these sessions were organized by Department of Zoology, Environmental Studies and Nature Green Club.</p>

Survey records 129 butterfly species in Pench

■ First ever survey in PTR discovers 49 new species

■ Ramtek Correspondent

THERE are total 129 species of butterfly from 5 families, of which 49 are new, in the Pench Tiger Reserve (PTR), a first ever survey conducted from March 10 to 12 has revealed. The survey was conducted by PTR management in collaboration with Tinsa Ecological Foundation.

Important species such as Blue Mormon, Conjoined Swift, Common Nawab, Brown King Crow, Peach, Scaled Palm Fly, Crimson Rose, Common Treehopper, Grass Demon, and Common Lascar were recorded during this survey.

Many dragon flies and damselflies were recorded at Pench river bed in Kollhura. Along with this, many spider species were also recorded near the camp area in East Pench.

There were a total of 105 participants from 11 states in the survey. The participants, 60 men and 45 women, were in the age group of 18-67 years.

Interestingly, around half of the participants were faculty and college students of Guru

Participants taking notes during the butterfly survey at PTR.

Ghasidas University, Bilaspur, Chhattisgarh, Kota University, Rajasthan, and Rashtrasant Tukadoji Maharaj Nagpur University, Maharashtra.

The survey was aimed at establishing base line data for the study of butterflies. Carrying out such surveys in different seasons will help deduce the dynamics of population and species across the annual cycle.

The participants were made into 65 camps, and 42 camps were selected for the survey, using proportional random sampling method across seven ranges of PTR. Each camp was taken as a centre, and three sampling trails covering major

beat areas were selected for the survey. PTR uses the same method for Carnivore survey during All India Tiger Estimation (AITE); the method was also used for the first Bird Survey in January 2023.

Participants were grouped in a team of 2-3 for each camp with minimum one expert butterfly observer and 2 amateurs. Each team covered a minimum of 3 survey trails (samples) or a maximum of 4, depending upon travel time from Sillari to their respective camps.

Participants used Pollard's Walk Method, a type of modified line transect method where an observer imagines a cube of 5m and records butterfly

observations. The data was collected on kobocollect, a free data collection tool set developed by Harvard Humanitarian Initiatives.

The inauguration of the survey was held at Amaldas Tourism Complex on March 10 with formal registration, distribution of kits, briefing on PTR by RFO Mangesh Das.

WWF India and Honorary Wildlife Warden Ajinkya Bhaskar briefed participants about the role of such citizen science surveys in the process of conservation. Dr P N Shukla, Deputy Director, PTR had words of appreciation and encouragement for the participants, followed by Atul Deokar, ACE PTR, and Dr Ashish Tiple, an Entomologist working in Central India.

Rajneesh Singh, Deputy Director, Pench TR, Madhya Pradesh, and Divya Bharti, DCE Neelghat Tiger Reserve were present as chief guests of the event. Dr Ami Kumar, Founder Tinsa shared the compiled result on butterfly diversity. All the participants were given certificates. Using the field data, Tinsa will prepare a technical report, which will be used for conservation interventions by PTR and follow up seasonal surveys.

REPORT ON VISIT---

- A visit has been planned for the BSc III Yr. students as prescribed by Nagpur University. So, all there were 53 students were accompanied to visit Bor Dam Fish Farm and Apiculture Unit at Wardha. There were all 53 students from BSc Sem-V from CBZ group who visited the fish breeding center at BORDHARAN in Wardha District on 26 September 2019 under the guidance of Dr Manisha Bhatkulkar. We all started from college at 7.30.00 am by 50 seater bus and all were very happy because it was a field visit and all students were ready to visit the fish farm and Apiculture unit. The students observed the process of Induced breeding in Katla and Labeo Chinese hatchery, breeding tank, spawn and fish fry. Students learned the importance of self-employment. Students have the practical experience and whatever they learn in the classroom; they observe in in the field itself.
- The next destination i.e. Apiculture unit at Wardha. we reached there at 1.30 pm. Dr Gopal Paliwal Director of Beekeeping and Management Centre Wardha, delivered a lecture and also shared very important information about Honey Beekeeping, and honey bee products and also shared information about government strategies with the help of a PowerPoint presentation. Her wife Dr, Mrs Paliwal also shared information about the physiology of honey bees and how we can test the honey from different points of view. Further, we went to Sevagram to visit BAPU KUTI ASHRAM and here only we had our lunch this time was not suitable for lunch but we were so hungry as we had our lunch and then we proceeded to visit the Gandhi Ashram (BAPU KUTI).

REPORT ON BIRD WATCHING

BIRD WATCHING PROGRAM AT GOREWADA LAKE (Batch-1)
AIMS AND OBJECTIVES: - 1. To encourage, organize and promote the study of birds and their habitat used particularly within the Gorewada Lake.

1. **Support the wider knowledge** and enjoyment of birds generally.
2. **Promote the recording** and wide circulation of the results of bird studies and observations.
3. Promote the **archiving** of observations, studies and records of birds particularly in the Gorewada region.
4. Carry out many other activities which is capable of being conveniently carried out in connection with the above objects, or which directly or indirectly advances those objects or any of them.

REPORT:-

Bird watching, or **birding**, is a form of wildlife observation in which the observation of birds is a recreational activity or citizen science. It can be done with the naked eye, through a visual enhancement device like binoculars and telescopes, by listening for bird sounds, or by watching public webcams.

Bird watching often involves a significant auditory component, as many bird species are more easily detected and identified by ear than by eye. Most birdwatchers pursue this activity for recreational or social reasons, unlike ornithologists, who engage in the study of birds using formal scientific methods.

Due to their accessibility and ubiquity, birds are a useful tool for environmental education and awareness on environmental issues. Birds easily transmit values on respect to nature and the fragility of ecosystem.

We have chosen Gorewada Lake for Birding this year .So around 21 students (Batch-1) from Environmental studies were participated in this event on **13th January 2019**. BIRD WATCHING PROGRAM AT GOREWADA LAKE (Batch-2)

AIMS AND OBJECTIVES: - 1. To encourage, organize and promote the study of **birds** and their habitat used particularly within the Gorewada Lake.

1. **Support the wider knowledge** and enjoyment of birds generally.
2. **Promote the recording** and wide circulation of the results of bird studies and observations.
3. Promote the **archiving** of observations, studies and records of birds particularly in the Gorewada region.
4. Carry out many other activities which is capable of being conveniently carried out in connection with the above objects, or which directly or indirectly advances those objects or any of them.

REPORT:-

Bird watching, or **birding**, is a form of wildlife observation in which the observation of birds is a recreational activity or citizen science. It can be done with the naked eye, through a visual enhancement device like binoculars and telescopes, by listening for bird sounds, or by watching public webcams.

Bird watching often involves a significant auditory component, as many bird species are more easily detected and identified by ear than by eye. Most birdwatchers pursue this activity for recreational or social reasons, unlike ornithologists, who engage in the study of birds using formal scientific methods.

Due to their accessibility and ubiquity, birds are a useful tool for environmental education and awareness on environmental issues. Birds easily transmit values on respect to nature and the fragility of ecosystem.
